DATE: 2 Aug '96NUMBER OF PAGES: 1ATTENTION: Stanko CventedFROM: Ernie HodsonMESSAGE: Dear Stanko,

I have been traveling all of this week and did not see your fax until this morning.

I have indicated to others here in Akron that Sava would be discussing compound equipment for products that they intend to relocate. What you propose is technically feasible but would have to be part of the final agreement. Personally I do not believe the location of the auto hose products to stay would be agreed to - I understand that the building is large enough but it would be another cost center and with additional costs for transporting compound etc. I also seem to remember that the steam was generated off site. You should note for your comments on mixing that Goodyear ~~is~~ routinely mixes coloured compounds in 'black' bomburies
